

YOU'VE VALIDATED YOUR CURRENCY WHEN...

Worksheets, updates
and comments
available online:

This chapter is very straightforward.

When do you know you're done currency testing?

The answer is:

When your Currency Calculator says there is a clear path to Victory.

You have just gone through a process to validate the path you created on your Currency Calculator spreadsheet. If you validated enough of the steps on your Currency Ladder to ensure that you can reach your Victory Currency, then you are on a path to Victory!

Test as many or as few of the steps as you need to so that you are confident that you are on your way to your Victory.
